

Application for a Conditional Use Permit

Date: JAN 22 2014 Issue # CUP2011-7, 8 & 9

The undersigned applies for a conditional use permit to do work herein described and located as shown on the plot plan. The undersigned agrees that all work will be done in accordance with the Buffalo County Zoning Ordinance and all other applicable ordinances of the County of Buffalo and all laws of the State of Wisconsin, applicable to said premises and with the information herein:

RECEIVED
JAN 21 2014

Owner Steve Segerstrom
Address 5055 State Rd. 37

Legal Description: (May be found on your real estate tax statement)
40 1/4 NE 1/4 Section 35 Town 24N Range 11W
Town of Mendota Parcel # _____

Location: State Rd 37 County Rd _____ Town Rd _____
Lot # _____ Block _____ Subdivisor _____
Lot Size _____ Acres 367 Spill/overflow? No

Proposed project and/or use: SEE ATTACHED
Use of adjoining property and other details: SEE ATTACHED
Dimension: Length _____ Width _____ Height _____ Square Ft. _____

Setbacks for project: if any distances are greater than 100', indicate as >100'
Highway Right of Way _____ feet Highway Centerline _____ feet
Front lot line _____ feet Rear lot line _____ feet
Side lot line (left) _____ feet Side lot line (right) _____ feet
Septic tank _____ feet Drainfield _____ feet
River _____ feet Stream _____ feet
Lake _____ feet Wetland _____ feet
Airport _____ feet Wind/Cell facility _____ feet

Work consists of:
New Building _____ Addition _____ Sign _____
Relocation of building _____ Substantial land alteration _____ Modification X

Describe in detail the request including any potential noise, odor, dust, smoke, glare, refuse, gas, effluent, or other potential nuisance resulting from the proposed use which may impact neighboring properties:
SEE ATTACHED

On the space below or separate sheet, sketch the location of the proposed structure or addition, and distance to:

Other existing buildings _____ Public roads _____ Bodies of water _____
Existing/proposed wells _____ Lot lines _____ Septic systems _____

Please use accurate dimensions for all existing buildings as well as proposed new construction. Failure to fully complete the application or plot plan will result in a delay in processing your application. If you have any questions, please contact the Zoning Department at (608) 685-6218 for assistance.

Fees: \$250 All CUP's except silica (frac) sand mines
\$3,500 Silica (frac) sand mines-Core sampling fees also required upon approval

Make checks payable to Buffalo County Treasurer and return completed application to:
Buffalo County Zoning, PO Box 482, Alma, WI 54810

Or email completed application with plot plan scanned in to: benjamin.bubitza@buffalocounty.com

Office Use Only:

Application for a Conditional Use Permit Modification

Proposed project and/or use: The proposed use has not changed: The mining and extraction of a natural resource (fracture sand), including the wet and dry processing of said natural resource.

Use of adjoining property and other details: The land use to the north is a gravel pit; to the south is agricultural crops and farmland. The land use to the east is also agricultural crops and farmland, and to the west is forest. The project site encompasses 367 acres in an Agricultural District. The property is located in the portions of Sections 28, 33, and 34, Township 24N, Range 11W, Town of Mondovi, Buffalo County, Wisconsin. The life expectancy of the mine is 20 years. The material to be mined consists of silica sand and limestone.

Describe in detail the request including any potential noise, odor, dust, smoke, glare, refuse, gas, effluent, or other potential nuisance resulting from the proposed use which may impact neighboring properties: This request is for a *modification/revision* to CUP #2011-7, 8 & 9. Applicant is proposing to remove Condition #5 of the permit(s) in question with regard to a dry processing facility only on the site. Applicant requests wet and dry processing at the site be permitted. Applicant has submitted an application for a high capacity well permit through the State of Wisconsin Department of Natural Resources. See Addendum A. Applicant does not expect the modification to impact the neighboring properties.

Map of Property/Components. A map with layout of the property showing the components of the operation is attached as Addendum B. The wet plant design is attached as Addendum C. An equipment list for the wet plant is attached as Addendum D.

Water Usage. With the addition of a wet processing facility, average daily water usage will be 400,000 gallons a day, with maximum water usage being 700,000 gallons per day, however, approximately 85% to 90% of the water will be recycled.

Surface Water/Wetlands. There are no ponds, lakes, streams or rivers located upon the property. Additionally, there are no wetlands located upon the property.

Topographic Map. A topographic map showing the drainage patterns of the site is attached at Addendum E.

Certification. Buffalo White Sand, LLC hereby certifies and commits to provide to Buffalo County financial assurance in accordance with the Buffalo County Zoning ordinance prior to commencing mining on the site.

Buffalo White Sand, LLC

High Capacity, School or Wastewater Treatment Plant
Well Approval Application

Form DNR-1016 (R 7/03)

Page 1 of 8

Notice: This department approval is required for the construction, reconstruction or operation of a high capacity well or system of high capacity wells, a public well or a wastewater treatment plant well in connection with Section NR 812.09(3)(c), Wisconsin Administrative Code. Personally identifiable information collected on this form, including such data as your name, address and phone number, will be used for management of department programs and is unlikely to be used for other purposes. This information will be published under Wisconsin Open Records Law, ch. 19.37 - 19.39, Wis. Stats.

Use this form to request an approval for installation of a well or wells on a high capacity property, seek approval to make other changes to a high capacity property or to modify a well on a high capacity property, as required by NR 812.09(3)(c), Wisconsin Administrative Code. Refer to definitions of high capacity well, high capacity property and high capacity well system on page 6.

This form is not intended to be used when seeking approval for construction or modification of wells serving water systems regulated under ch. NR 811, Wis. Admin. Code. Any water system serving 7 or more houses, 14 or more mobile homes, 20 or more apartments, 20 or more condominiums, or 10 or more dwellings is regulated under ch. NR 811, Wis. Admin. Code. See NR 811.01, Wis. Admin. Code for applicability requirements.

Applicant Information

Property Information

Enter the High Capacity Well File Number below. If the property is already a high capacity property, if the property is not designated as a high capacity property in the file of application, enter "NONE." NOTE: Find the file number in upper right hand corner of the most recent high capacity well approval, or use the compact disk of departmental well data that is issued to all new and existing installers. On the compact disk, see "File Number" in red print in "Location" section. File number format is as follows: (1 or 2 digit for county) - (1 digit for well classification) - (1 to 4 digits for assigned property no.)

| | | |
|---------|--------|-----------------------------|
| County | Town | High Capacity Well File No. |
| Buffalo | Monroe | None |

Submittal Purpose

Check all that apply:

Install one or more new wells with a capacity greater than 70 gallons per minute.

Install one or more new wells with a capacity less than 70 gallons per minute on a high capacity property.

Replace one or more wells with a capacity greater than 70 gallons per minute.

Replace one or more wells with a capacity less than 70 gallons per minute on a high capacity property.

Reconstruct one or more wells with a capacity greater than 70 gallons per minute.

Reconstruct one or more wells with a capacity less than 70 gallons per minute on a high capacity property.

Increase pumping rate in one or more wells to a rate greater than previously approved.

Request continued operation of high capacity wells after a change in ownership. (No application fee required.)

Renew a previous approval that has expired.

Well (or wells) will serve a school or wastewater treatment plant. See definitions on page 6.

Other, explain _____

Site Status Information

Determine the site status using the internet or the compact disc of departmental well data that is issued to drillers and pump installers and the information supplied by the property owner. Internet address is dcr.wi.gov/eng/wells/hogfiles.htm. Enter YES or NO for each of the following questions.

YES NO

Has the property boundary changed since the most recent high capacity well approval was issued? If the property is not yet a high capacity property, check NO.

Has there been a change in well ownership since the last approval was written?

If YES, name of current owner:

Date of purchase:

Has there been a change in well operator since the last approval was written?

If YES, name of current operator:

Date of change:

Will a proposed well be connected to a plumbing system that is supplied by other sources (other wells, municipal supply, etc.)? If YES, include a schematic drawing showing backflow protection.

Is a proposed well within 1,200 feet of a landfill? Determine if there are any landfills nearby, using the well information compact disc FBO feature. Enter the township, range and section of the well location. If the well is near a section line, also check the adjacent section or sections.

If YES, list the landfill site ID Number:

OR Landfill location: (Township/Range/Section)

Is a proposed well on a property that has a contaminated site? If YES, list the DNRIS (Bureau for Remediation and Redevelopment Tracking System) Number here and specify if the site is open or closed:

 Open Closed

Is a proposed well on a property that has a groundwater use restriction recorded on the deed? If YES, list the DNRIS number, as assigned to the contaminated site by the DNR remediation and redevelopment program:

Is a proposed well on a property that is listed on the department's registry of closed remediation sites for a groundwater use restriction? See compact disc or internet at apps.dcr.state.wi.us/dnr/stratreg/wells-ferb. If YES, list the DNRIS Number here:

Is a proposed well to be used for a public water supply system that serves 25 or more people? See definition of a "public water system" in the definitions section on page 5.

Is a proposed well to be installed within a special casing area? Refer to the list of special casing areas that is published by the department and/or contact the regional DNR office.

Has the number of wells or pumping capacity in an existing well increased since the most recent high capacity well approval was issued?

Has the number of wells decreased since the most recent high capacity well approval? If the property is not yet a high capacity property, check NO.

Is a non-pressurized storage vessel (i.e. reservoir) other than a pond proposed or in use?

Will the well discharge directly to a storage pond?

Is a pressurized tank with a capacity greater than 1,000 gallons proposed or in use?

Is a proposed well within 1,200 feet of a quarry?

Is a proposed well located in a floodplain or floodway?

Are any existing well installations on the high capacity property out of compliance with Chapter NR 812, Wisconsin Administrative Code?

Will the well be used as a source of bottled water?

Are you seeking a variance to construct a well that has a capacity of less than 70 gallons per minute in low capacity well construction standards?

Is the property served by a community water system?

Existing Well Information

Enter the following information on all existing wells on the property. If more than four wells, submit additional sheets.

| | | | | |
|---|---------------------|---------------------|---------------------|-------------|
| Well Name Assigned by Well Owner (North Well, etc.) | Jim Mankel | | | |

Required Attachments

- Attach one of the maps described in A. or B., below. Plot the existing and proposed well locations on the map. For wells that have a Wisconsin Unique Well Number or a Permanent High Capacity Well Number, plot the well locations with one of those numbers.
 - Copy of a plat map with the property boundary clearly shown. If the property is contiguous with properties owned by the same owner or another township, include a copy of that township map too, showing the property boundaries. If the property owner listed on the plat map is different from the current owner, list the date or dates that the current property owner purchased the property on the map.
 - Map of the property prepared by a licensed land surveyor and the property description as described by the surveyor.
- Sketch map showing all of the following that are planned or exist within 300 feet of each proposed well: proposed well location; other wells; property boundary; wetlands; potential contaminant sources (septic tank and drainfield, petroleum storage tanks, sewer lines, etc.); buildings and north arrow. If no pertinent features to map within 300 feet of the proposed well, for example an irrigation well in the middle of a field, state that on the property map listed above and plot the well locations on that map.
- Any well construction records available for existing wells on the property. Do not attach any well construction records for wells that are not on the property. If a Wisconsin Unique Well Number has not been assigned, write a well name or site well number on the record that correlates to the well name or number plotted on the maps.
- For proposed wells with a capacity greater than 400 gallons per minute, include the performance curve or performance table that is provided by the pump manufacturer. If the pump will be a freshwater turbine, provide a curve with the same rpm as the motor under full load and list the motor horsepower.
- If more than one well is connected to a common plumbing system, also provide a schematic drawing of the system showing method of preventing backflow. This sketch must include the well discharge (pitches, over top of casing sanitary seal); the water line from the well; pressure tanks; sampling ports; check valves; backflow preventers; air gaps; manually operated valves; water meters; pressure switches for pumps; and any other pertinent fittings. This schematic drawing must also identify which of these components are buried or above ground. If there is more than one check valve within the well casing, include in-well check valves on the schematic.
- If reconstruction of an existing well is proposed, include a diagram of the current well construction and a diagram of the proposed construction.
- If the application is for a high capacity well or wells, a \$500.00 check payable to the Department of Natural Resources, unless the application is only for continued operation after a change of ownership.

Certification and Applicant Signatures

If the application requests a variance for a well within 1,200 feet of a landfill, a well on a property with a groundwater use restriction, or any other variance to NR 812, Wis. Adm. Code, the property owner must sign the application. If the well sponsor will install a well on property that he or she does not own, the property owner must also sign the application. Otherwise, an agent of the owner may sign the application.

Unsigned and incomplete applications will not be approved.

By signing this form, the person signing this application certifies that to the best of his or her knowledge, all existing well installations on the property comply with ch. NR 812, Wis. Adm. Code. The person also certifies that to the best of his or her knowledge, all information in the application is accurate and correct.

Definitions from Wisconsin Administrative Codes

"High capacity well" means a well constructed on a high capacity property. [NR 812.07(51)]

"High capacity property" means one property on which a high capacity well system exists or is to be constructed. [NR 812.07(52)]

"High capacity well system" means one or more wells, cisterns or mine shafts used or to be used to withdraw water for any purpose on one property, if the total pumping or flowing capacity of all wells, cisterns or mine shafts on one property is 75 or more gallons per minute based on the pump curve at the lowest system pressure setting, or based on the flow rate. [NR 812.07(53)]

"Public water system" means a system for the provision to the public of piped water for human consumption if such system has at least 15 service connections or regularly serves an average of at least 25 individuals daily at least 10 days per year. A public water system is either a community water system or a non-community water system. Such system includes: (a) Any collection, treatment, storage, and distribution facilities under control of the operator of such system and used primarily in connection with such system, and (b) Any collection or pretreatment storage facilities not under such control which are used primarily in connection with such system. [NR 812.07(50)]

"School" means a public or private educational facility in which a program of educational instruction is provided to children in any grade or grades from kindergarten through the 12th grade. Water systems serving athletic fields, school forests, environmental centers, home-based schools, day-care centers and Sunday schools are not school water systems. [NR 812.07(34)]

"Wastewater treatment plant" means any facility provided for the treatment of sanitary or industrial wastewater or both. The following types of facilities are excluded: (a) Facilities defined as private sewage systems in s. 145.01(12), Stats. (b) Pretreatment facilities from which effluent is directed to a public sewer system for treatment. (c) Industrial wastewater treatment facilities which consist solely of a land disposal system. [NR 114.00(14)]
